I. ABSTRACT

Windchill, a PLM solution, enhances the SDLC by providing robust project management, requirement tracking, design collaboration, version control, quality assurance, and release management tools. It integrates with CAD systems, manages documentation, and facilitates collaboration throughout the planning, analysis, design, implementation, testing, deployment, and maintenance phases, ensuring efficient and high-quality software development.

HTML (HyperText Markup Language) and CSS (Cascading Style Sheets) are two fundamental technologies used for creating and styling web markup language for creating the structure and content of web pages, while CSS is used to control the visual presentation of that content.

II. ACKNOWLEDGEMENT

I am thankful to **Ms. S. K. Kawale** (Lecturer, Department of Computer Technology) for guiding me in the successful completion of Industrial Training, in the partial fulfillment of Diploma in Information Technology during the academic year 2024 – 25.

I am also thankful to my industry mentor Mr. Shakil Shaikh Owner, of **Augmentix PVT.LTD.** For granting permission for industrial training and guiding on various portfolios of advanced technologies implemented in current scenarios across the globe.

We are also thankful to our **Mrs. A.V.Kurkute** Head of Department (Computer Technology), **Dr. M. S. Jadhav** Principal for their consistent and valuable support in the completion of training. Our sincere gratitude to all those who supported directly or indirectly for the completion of training.
